Weekly Coal Production

Production for Week Ended:
February 13, 1993

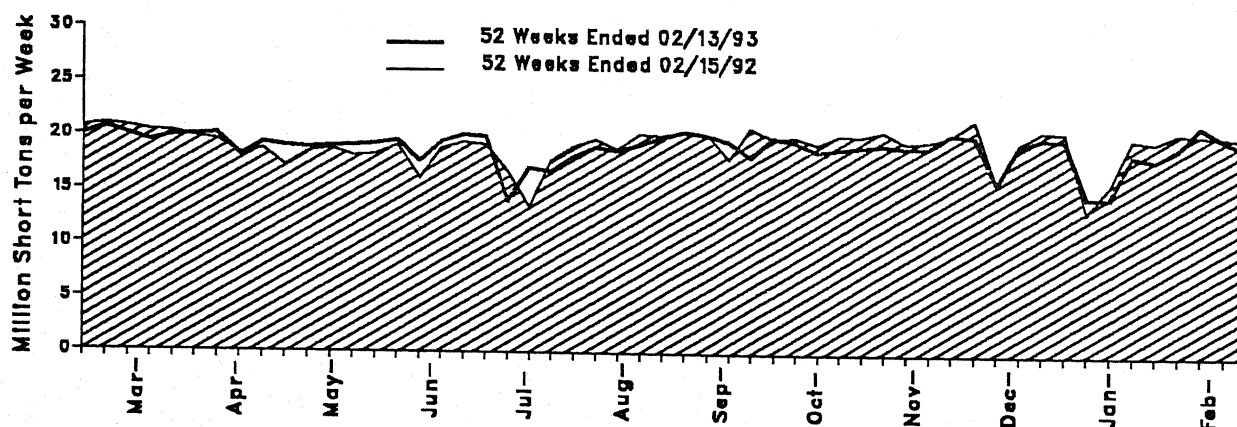

Summary

U.S. coal production in the week ended February 13, 1993, as estimated by the Energy Information Administration from railroad car loadings, totaled 19 million short tons. This was 5 percent less than in the previous week, and in the comparable week in 1992.

Production east of the Mississippi River totaled 10 million short tons, and production west of the Mississippi River totaled 9 million short tons.

The United Mine Workers of America (UMWA) selective strike, which began on February 2, 1993, continued at coal mines and preparation plants owned and operated by Peabody Coal Company in Illinois, Indiana, western Kentucky and by Eastern Associated Coal Company in West Virginia.
